BotoxEffect

with CALMOSENSINE™ and GLYCOLIFT™

BotoxEffect neuropeptide collection is a natural, toxin-free alternative to Botox injections that works to reduce the appearance of fine lines and wrinkles caused by repeated facial expressions.

Neuropeptide CALMOSENSINE™ and biosaccharide GLYCOLIFT™ combine with a synergistic blend of botanical oils, herbal extracts, CoQ10, plant protein and vitamins to tone the skin and to diminish the signs of aging.

BotoxEffect may be used daily to soften the appearance of fine lines and wrinkles. It provides an immediate lifting and firming look to the skin and is excellent to use before special occasions.

BotoxEffect collection consists of serum and cream, both innovative and effective anti-aging combinations of natural ingredients in their optimal concentrations.

BotoxEffect Collection:

LiftCream - 40 mL, 100 mL

Serum - 3 mL

Mastic

with LAKESIS extract

On the island of Chios, Greece, ancient Mastic trees produce a resin which drops from the trunk into the shape of tears.

Once crystallized, a precious oil is extracted to produce the anti-aging ingredient: LAKESIS.

Mastic products are based on LAKESIS oil, an ECOCERT and COSMOS certified ingredient which carries unique rejuvenating potential.

Ideal for aging skin, this revolutionary skincare delivers effective results, primarily focusing on smoothing the appearance of fine lines and wrinkles for visibly younger looking skin.

Mastic Collection:

LiftCream - 40 mL, 100 mL

Serum - 3 mL

Mastic with LAKESIS represents a new strategy to reverse the signs of aging. It combines recent discoveries in the scientific field of cosmetology with the principles of all-natural plant derived ingredients.

Mastic with LAKESIS is effective not only for the face, but also the neck, décolletage and hands, where cosmetic surgery options are very limited.

Oxygen

with OXYCELL®

One of the biggest celebrity beauty secrets is the oxygen facial.

Madonna, Katy Perry, Justin Timberlake, Victoria Beckham, Jessica Biel, Naomi Campbell, and Kim Kardashian are just some of the celebrities who rely on oxygen facials, and for good reason.

Age, physiology, stress, smoking, environmental pollution are the main factors leading to oxygen deficiency. Oxygen deficient skin does not adequately absorb the nutrients needed for a healthy appearance.

Oxygen collection features recently developed OXYCELL® placenta Filatov, a vegetal extract which works together with other natural super boosters to saturate skin with an intense surge of moisture and oxygen and to protect against the abuse of the elements.

The look of healthy skin with radiant vitality becomes achievable.

Oxygen Collection:

OxyMask - 40 mL, 200 mL

OxyCream - 40 mL, 200 mL

Serum - 3 mL
